

Central air conditioning and heat pumps

No matter the season, high-efficiency heating and cooling equipment helps keep your home more comfortable year round and helps to reduce energy costs.

Required documentation to submit with your HEAT Loan Intake Form:

- Signed contractor proposal that includes:**
 - Manufacturer and complete model number of equipment
 - SEER, EER, and/or HSPF efficiency rating
 - Scope of work and pricing
- Matching AHRI certificate or AHRI reference number. AHRI certificates can be found at ahridirectory.org using the equipment model number.**

Notes:

Central air conditioning and heat pumps

Minimum efficiency standards

Standard central air conditioning and central heat pump rebates		
Rebate amount ¹	Equipment type	Efficiency requirements
\$50 per ton	Central Air Conditioning	AHRI SEER ≥ 16, EER ≥ 13
\$250 per ton	Central Heat Pump	Refer to Heat Pump Qualified Products List at MassSave.com/HPQPL

Fuel optimization rebates				
Rebate amount ¹	Equipment type	Efficiency requirements	Primary fuel type	Additional requirements
\$1,250 per ton	Central Heat Pump	Refer to Heat Pump Qualified Products List at MassSave.com/HPQPL	Oil or Propane	Integrated Controls required unless central heating system is removed ³ . Refer to Integrated Controls Qualified Products List at MassSave.com/ICQPL
			Electric Resistance Heat	900 kWh difference between sum of 3 winter-usage and 3 lowest-usage months
Up to \$500 per indoor unit, max of \$1,500	Integrated Controls	Add-on to existing central heat pump	Oil or Propane	Refer to Integrated Controls Qualified Products List at MassSave.com/ICQPL

Standard mini-split and heat pump rebates		
Rebate amount ¹	Equipment type	Efficiency requirements
\$250 per ton	Mini-Split Heat Pump	Refer to Heat Pump Qualified Products List at MassSave.com/HPQPL

Fuel optimization mini-split heat pump rebates				
Rebate amount ¹	Equipment type	Efficiency requirements	Primary fuel type	Additional requirements
\$1,250 per ton	Mini-Split Heat Pump	Refer to Heat Pump Qualified Products List at MassSave.com/HPQPL	Oil or Propane	Integrated Controls ² required unless central heating system is removed. ³ Refer to Integrated Controls Qualified Products List at MassSave.com/ICQPL
			Electric Resistance Heat	900 kWh difference between sum of 3 winter-usage and 3 lowest-usage months
Up to \$500 per indoor unit, max of \$1,500	Integrated Controls ²	Add-on to existing mini-split heat pump	Oil or Propane	Refer to Integrated Controls Qualified Products List at MassSave.com/ICQPL

¹ Actual tons are calculated based on AHRI cooling capacity divided by 12,000 Btus. Rebate amount based on actual tons.

² Integrated Controls are either approved control packages or dual fuel thermostats that switch between a heat pump and a central heating system.

³ The Sponsors of Mass Save do not recommend fully replacing existing central heating systems with heat pump equipment. Customers that choose to do so may access the Fuel Optimization incentive levels without the installation of an integrated control. Please see Terms & Conditions for full requirements. Cannot be combined with other rebate for same equipment.

Financing details

- If you're installing central A/C or a central heat pump, you must obtain a proposal from and have work completed by a Mass Save measureQuick trained contractor. Visit [MassSave.com/findacontractor](https://masssave.com/findacontractor) for a list of measureQuick contractors.
- Equipment that does not meet the efficiency standards above as well as Do-It-Yourself (DIY) installations do not qualify.
- Municipal customers that heat with natural gas do not qualify for electric upgrades.
- Electrical panel replacements or upgrades may not exceed \$500.
- Fuel optimization rebates cannot be combined with standard rebates for the same equipment.
